Commenting on the results, UK Eke, MFR, the Group Managing Director said:

"FBNHoldings has again demonstrated its strong revenue generating capacity in the current economic environment reporting gross earnings of A288.8 billion - up 7.8% y-o-y. In line with our strategic focus on improving asset quality; cost optimisation; and, enhancing revenue generation, we are beginning to see improvement across a number of metrics associated with these initiatives.

Our focus on enhancing the quality of our loan book is reflected in a decline in non-performing loans, a reduction in our impairment charge following improvement in the asset quality outlook, and we will continue to prioritise this area through the rest of this year. Similarly, consistent improvement in the efficiency ratio is testament to the efficacy of our cost optimisation initiatives, though these results have been partly offset by the currency devaluation and high inflationary environment.

### **Group Financial Review**

#### Income Statement

Gross earnings grew by 7.8% y-o-y to \$\text{\texi}\text{\text{\text{\text{\texi}\text{\text{\text{\text{\text{\texi}\text{\text{\texi}\text{\text{\text{\text{\text{\text{\te\

**Net-interest income** improved by 30.2% y-o-y to \u2214164.1 billion (Jun 2016: \u2214126.1 billion). This was driven by enhanced interest income opportunities from treasury activities along with improved yields on the loan book. Interest expense however increased to \u221468.3 billion (Jun 2016: \u221443.2 billion).

Cost of funds increased to 3.5% (Jun 2016: 2.4%) as the new pricing structure reflected the high interest rate environment. Despite this, we have been successful in optimising our balance sheet and in achieving superior yields on each asset class. This resulted in a blended asset yield of 12.1% from 9.7% in the prior period. As a result, net-interest margin increased to 8.5% from 7.2% in the prior period.

**Non-interest income** (NII) decreased by 46.3% y-o-y to 450.5 billion. Foreign exchange income (including FX revaluation gains) in the period decreased to 45.0 billion (Jun 2016: 452.9 billion), representing 9.9% of non-interest income (Jun 2016: 56.3%). Excluding FX revaluation gains, NII would have been flat at 0.4% showing that the fundamentals of our business continue to remain strong, even in the current business environment.

Fees and commission (F&C) income, representing 72.8% (June 2016: 36.9%) of total non-interest income, grew by 5.9% to N36.8 billion (Jun 2016: N34.7 billion). The growth in F&C income was driven predominantly by: a 2.4% y-o-y increase in electronic banking fees to N10.6 billion (Jun 2016: N10.4 billion); a 35.5% y-o-y growth in other fees and commission to N10.5 billion (Jun 2016: N7.7 billion); and, to a lesser extent, an increase in credit related fees, funds transfer and intermediation fees, and letter of credit commission and fees respectively to N2.9 billion (+64.8% y-o-y), N2.2 billion (+20.5% y-o-y) and N2.0 billion (+158.7% y-o-y). Electronic banking fees sustained its high contribution to F&C at 28.8% (Jun 2016: 29.8%) as we expect further growth on the back of improving foreign exchange liquidity and services through alternative channels.

Non-interest income was further supported by the 56.9% y-o-y growth in net insurance premium revenue to 45.5 billion (Jun 2016: 43.5 billion) as we focus on further extracting the opportunities through enhanced value creation and collaboration within our businesses and improve revenue generation.

Operating expenses increased by 11.8% y-o-y to Al16.6 billion (Jun 2016: Al104.3 billion), however this remains below inflation rate of 16.1% as we improved our budgeting process and discipline in spending.

Cost-to-income ratio closed at 54.4% (Jun 2016: 47.4%<sup>20</sup>). Though within our guidance, the higher ratio in the current period reflects a normalised performance from the one-off foreign exchange revaluation gains of the previous period. We remain optimistic on further efficiencies in our business following the implementation of a number of initiatives within the Group.

**Net impairment charge on credit losses** declined by 10.7% to N62.4 billion (Jun 2016: N69.9 billion) as our asset quality improves and we continue to make progress in our remediation, recoveries and other portfolio management initiatives. **Cost of risk** decreased y-o-y to 5.4% (Jun 2016: 6.5%), while NPL ratio closed at 22.0% (Jun 2016: 22.8%, Dec 2016: 24.4% and March 2017: 26%).

During the quarter, one of the top NPLs, previously provisioned, was written off (not charged –off) with significant progress made on realisation of assets for full recovery, while we will expect a reclassification of another major NPL in the next quarter.

**Profit before tax** closed 22.4% lower y-o-y at N35.6 billion (Jun 2016: N45.9 billion). Income tax expense was N6.1 billion (Jun 2016: N10.0 billion). This resulted in **earnings per share**<sup>21</sup> of N1.64 (Jun 2016: N10.97), with **post-tax return on average equity** of 9.9% (Jun 2016: 12.0%) and **post-tax return on average total assets** of 1.2% (Jun 2016: 1.6%). However, in view of our current initiatives, we are optimistic of enhanced performance in the remaining half of 2017.

### Statement of Financial Position

**Total assets** increased by 3.0% y-t-d to N4.9 trillion (Dec 2016: N4.7 trillion); this was essentially driven by an increase in investment securities and other treasury activities. Investment securities increased by 1.3% y-t-d to N4.26 trillion (Dec 2016: N4.25 trillion) while loans to banks grew to N731.2 billion, a growth of 64.4% y-t-d from N444.9 billion at year end. Total interest earning assets grew by 5.6% y-t-d to N43.9 trillion from N43.7 trillion, representing 81.0% of total assets (Dec 2016: 79.0%).

**Total customer deposits** declined by 3.5% y-t-d to N3.0 trillion (Dec 2016: N3.1 trillion) as we focus on ensuring an appropriate deposit mix at an optimum price. Domiciliary deposits declined to N468.9 billion from N564.7 billion following State related remittances which have now been completed. Savings deposit representing 32.4% of total deposit grew by 1.9% to N971.1 billion (Dec 2016: N952.7 billion) reflecting the strength of our retail franchise and the ability to keep attracting a well-diversified funding base despite the difficult but improving market condition.

Total loans & advances to customers (net) declined marginally by 4.1% y-t-d to N2.0 trillion (Dec 2016: N2.1 trillion) driven by repayments, portfolio rebalancing and write-off of assets that have been fully impaired as we remain focused and deliberate in growing good quality risk assets supported by our revamped risk management framework. The sectors that contributed to the decrease in loans were essentially in oil and gas, manufacturing, public sector and general<sup>22</sup>.

<sup>&</sup>lt;sup>21</sup> Annualised. From continued operations

<sup>&</sup>lt;sup>22</sup> General sector includes personal & professional, hotel & leisure, logistics and religious bodies

We are making significant progress towards achieving our strategic targets. This is evident in the decline in the non-performing loans to 22.0% from 26.0% in the last quarter, and we expect this trend to continue over the coming quarters.

Shareholders' funds closed at \$4609.9 billion, up 4.7% y-t-d (Dec 2016: \$4582.6 billion), benefitting largely from an increase in: retained earnings (up 11.6% y-t-d to \$4180.5 billion (Dec 2016: \$4161.6 billion)); foreign currency translation reserves (up 10.5% y-t-d to \$438.4 billion (Dec 2016: \$434.8 billion)); AFS (up 7.0% y-t-d to \$429.4 billion); as well as, \$5123 reserve (up 41.4% y-t-d to and \$48.6 billion) (Dec 2016: \$46.1 billion)).

Capital adequacy ratio for FirstBank (Nigeria) closed at 17.6% (Dec 2016: 17.8%) above the current regulatory minimum of 15%, while the Capital adequacy ratio for FBN Merchant Bank closed at 26.7% (Dec 2016: 22.6%) above the 10% required by regulation for Merchant Banks.

**Liquidity ratio** for FirstBank (Nigeria) closed at a healthy 50.4% (Dec 2016: 52.7%) above the 30% regulatory mark.
